The Seafarers’ Charity’s grant making:

1. **Supports seafarers**: by providing funding to maintain and develop evidence-based bespoke services that respond to the unique needs and experience of seafarers.

2. **Delivers on our Thrive Strategy**, our three pathways (Global, Preventative and Advocacy) and our 5 Strategic Outcomes.

3. **Demonstrates innovation and collaboration**: by working in close partnership with others to identify opportunities and develop partnerships where appropriate.

4. **Has maximum impact**: for seafarers, their families and/or the wider maritime and charity sector. The funding need should be clearly articulated with baseline data, and be measurable through a formal monitoring & evaluation process.

5. **Engages seafarers**: in the development of programme or service design and delivery, and actively encourages their feedback to ensure the organisation learns from seafarers’ experience.
